The governor then commences the business of the day and asks the secretary to announce the passage of a new law relating to the state of New York. The governor adds that this new law will provide for the treatment of all criminals.

The drain of the state continues to be a cause of concern. The governor mentions that the state has spent a large amount of money on the construction of roads, and that the state must ensure that these roads are maintained properly.

The state is also facing financial problems. The governor states that the state's share of the liquor tax for the year ending April 30, 1904, has been spent on various projects.

The governor concludes his speech by saying that the state must continue to work towards the betterment of the state and its people.

When Necessary

to burn electricity all night one of our combination "TURN
DOWN" Electric Lamps is most suitable. You will find sufficient
light for such purposes and the expense is about as much all night as the 10-cent
candle power for one hour. By
pulling a string you get either a
dim or bright light. Worth
looking at.
